HR Leave Management System Documentation

Project Overview

The HR Leave Management System is a web-based application designed to help organizations manage employee leave requests efficiently. It replaces manual Excel tracking with an automated system.

Objectives

- Allow employees to view leave balance

- Submit leave requests
- Enable HR to approve/reject requests
- Automatically deduct leave balance

System Users

Employee

- ❖ Login / Register
- ❖ View Dashboard
- ❖ Submit Leave Request
- ❖ Track request status

HR Manager

- ❖ Login
- ❖ View all requests
- ❖ Approve / Reject requests
- ❖ Monitor employees

System Workflow

Main Process

1. Employee submits leave request

2. Request is saved as "Pending"
3. HR Manager reviews the request
4. HR Manager approves or rejects
5. If approved (leave balance is deducted)

➤ Database Design

Users Schema

- id
- name
- email
- password
- role
- leave_balance

Leave Requests Schema

- user_id (ref)
- leave_type
- start_date
- end_date
- reason

- status

Functional Requirements

- User authentication (login & registration)
- Role-based access control
- Submit leave requests
- Approve/reject requests
- Automatic leave balance calculation

Non-Functional Requirements

- Security (authentication & authorization)
- Performance (fast response time)
- Usability (simple and intuitive UI)

System Pages

Phase1- Login Page

Description

Allows users to securely access the system using their credentials.

Features

- Email input
- Password input
- Login button
- Link to Register page

Flow

1. User enters email and password
2. System validates credentials
3. User is redirected to the appropriate dashboard

Register Page

Description

Allows new users to create an account.

Features

- Full Name
- Email
- Password
- ConfirmPassword

- Department

Flow

1. User fills in registration form
2. Account is created
3. User can login

Phase 2- Employee Dashboard

Description

A personalized interface where employees can manage their leave information.

Features

- View leave balance
- View previous leave requests
- View request status (Pending / Approved / Rejected)
- Notify user with the status of Leave request
- Button to submit new leave request

Flow

1. Employee logs in

2. Dashboard displays leave data
3. Employee can submit a new request

Phase 3- Leave Request Form

Description

Form used by employees to request leave.

Fields

- Leave Type
- Start Date
- End Date
- Reason
- Attachment for reason

Flow

1. Employee fills out the form
2. Clicks Submit
3. Request is stored with status "Pending"
4. HR Manager receives the request

Phase 4 - HR Manager Dashboard

Description

A control panel for managing employee leave requests.

Features

- View all leave requests
- View employee details
- Approve or reject requests
- View statistics (total requests, approvals, etc.)

Flow

1. HR logs in
2. Views pending requests
3. Approves or rejects request
4. System updates request status

Conclusion

The HR Leave Management System enhances organizational efficiency by automating leave tracking, reducing manual errors, and improving communication between employees and HR.
